

Application: Warehouse Labels and Signs

Camcode, your solution provider

No two warehouse applications are alike. That's why we're here. Camcode works with you to design the best bar code label solutions for your warehouse. By understanding your goals for automation of your inventory system, we can assure you receive the highest value [warehouse labeling](#) solutions.

Warehouse labels designed for function and performance...

Our **Floor Label Systems** can take the abuse of heavy lift truck traffic, turning and dragging of skids, as well as motorized hand lift trucks.

Rack Location Labels are graphically designed to eliminate the confusion of which rack is being scanned. Engineered from a variety of materials and attachment methods to assure that you get the performance you need for your application.

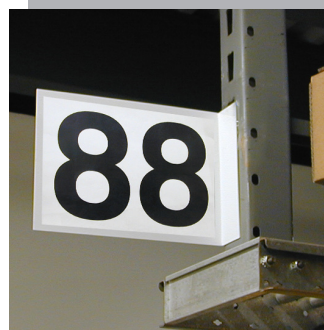

Our **Long-Range Labels** can be scanned from distances up to 50 feet. We work with you to identify the best mounting method.

Anodized Aluminum Pallet Labels resist scuffing and abrasion. High performance adhesives or mechanical attachment methods provide outstanding performance.

Returnable Container, Tote and Tray Labels are great for tracking containers and contents. Our durable labels can resist cleaning processes, abrasion, chemicals or even outdoor exposure.

Custom Signs are ideal for identifying rack and shelf ends.

Our customers include...

Ace Hardware, Bose Corporation, Dow Corning Corporation, DuPont, Eli Lilly & Company, Gillette Co., Goodyear Tire and Rubber, JO-ANN Stores, Inc., Office Max Distribution Center...

Warehouse Floor Bar Code Labels

Our aluminum floor label kit is the most durable product you will find.

We begin with a protective 1/8" beveled aluminum frame that is easily attached to the floor by four concrete anchors. The Metalphoto® aluminum bar code label, with 3M semi-permanent adhesive, is placed in the frame followed by a Lexan® cover layer. The frame protects the label from the abuse of pallets and vehicular traffic. If, for any reason, the label needs to be changed, simply pop out the existing label with a screwdriver and replace with another. The label kit comes with instructions, concrete anchors and a concrete drill bit for easy installation.

Metalphoto® is a registered trademark of Horizons. Lexan® is a registered trademark of GE Plastics

Our adhesive floor label kit saves hours in installation time and expense, and is the most durable adhesive-applied floor label system you will find. The kit includes a protective 1/8" beveled aluminum frame backed with a specially formulated pressure sensitive backing making installation as easy as peel and stick. The Metalphoto® aluminum bar code label is placed in the frame which protects the label from the abuse of pallets and vehicular traffic. If, for any reason, the label needs to be changed, simply pop out the existing label with a screwdriver and replace with another. The label kit comes with instructions, frame and pre-printed labels for easy installation.

Rack Bar Code Labels

We design each rack label for your application. By considering your inventory system, scanner type, scanning distance and angle, and mounting method, we assure that you receive the highest value label solution.

Our most popular - **Polyester Rack Labels** are more durable and longer lasting than typical paper labels. Graphic elements are added to eliminate confusion and improve functionality. Permanent pressure-sensitive adhesive provides lifetime adherence.

Our **Magnetic Rack Labels** are perfect if you require the ability to relocate labels. They consist of a durable premium polyester label with a magnetic backer.

Our **Multi-Level Rack Systems** can eliminate the need for long-range scanners. Graphic elements are designed to remove the confusion of which rack to scan. Foam tape adhesive makes assembly easy.

Our **Cold Storage Rack Labels** are designed for installation in environments as low as -20°F. The adhesive performs well in both cold and damp environments as well as elevated temperatures. Our **Cold Storage Rack Placards** feature an aluminum backer and mechanical attachment for areas as cold as -40°F.

Our **Cover-Up Rack Labels** are designed with a special 100% opaque material for no-bleed-through installation over existing labels.

Long-Range Retro-Reflective Bar Code Labels

Designed to reach scanning distances up to 50 feet with long-range scanners. These label systems provide the ultimate in functionality.

Our **Rack Retro-Reflective Labels** provide the ultimate in functionality. Need to scan upper level racks while standing on the floor? Then our retro-reflective label, combined with a design that enables dramatic scan angle, may be just what your need. Normal labels just won't achieve the same results!

Our **Two-Sided Retro-Reflective System** is designed to hang from chain or attach to suspended wire. Slanted sides provide proper scanning angle. Designed to reach scanning distances over 50 feet with long-range scanners.

Our **Fixed Mount Retro-Reflective System** includes holes or foam tape adhesive for mounting to a bar joist or any existing fixture. Slanted sides provide proper scanning angle. Designed to reach scanning distances over 50 feet with long-range scanners.

Our **Hanging Retro-Reflective System** is designed to hang from chain or attach to suspended wire. Our universal hanging bracket provides proper scanning angle. Designed to reach scanning distances over 50 feet with long-range scanners.

Our **Pipe Mount Retro-Reflective System** is designed to hang from conduit or PVC and provide proper scanning angle. Two holes at the top of the bracket provide the option of adding zip ties. Designed to reach scanning distances over 50 feet with long-range scanners.

Pallet Bar Code Labels

Developed for tracking returnable pallets, these durable Metalphoto® aluminum bar code labels resist scuffing and abrasion. Supplied with a specifically engineered 3M pressure-sensitive adhesive for permanent attachment. These bar code labels can last the life of your pallet.

Returnable Container, Tote and Tray Bar Code Labels

Our durable bar code labels are ideal for tracking your totes, trays, containers and other returnables. Our labels can resist cleaning processes, abrasion, chemicals or even outdoor exposure.

Custom Signs

Camcode produces Custom Signs for every application. From hanging signs, to aisle signs, to dock door signs that need to last outdoors...

Our [Hanging Signs](#) have a lightweight, yet tough white plastic backer for high visibility. Holes are added for hanging. Text and/or bar codes are produced to yield long distance readability. All of our warehouse signs are custom designed to meet your needs.

Our **Fixed Mount Signs** have a lightweight, yet tough white plastic backer for high visibility. Holes or adhesive strips are added for mounting. Text and/or bar codes are produced to yield long distance readability. All of our warehouse signs are custom designed to meet your needs.

Our [Aisle Signs](#) are ideal for identifying rack and shelf ends. They are constructed from a lightweight, yet tough white plastic backer for high visibility. For attachment, we include holes, adhesive or magnets. Text and/or bar codes are produced to yield long distance readability.

Our **Outdoor Door** and **Dock Signs** are produced of Metalphoto® anodized aluminum which **lasts 30 years outdoors!** This durable sign is photographically imaged below the surface creating an impenetrable barrier to salt, dirt, chemicals, sunlight and solvents. No other sign will last as long!

Our **Indoor Door** and [Dock Signs](#) have a lightweight, yet durable white plastic backer and two strips of 3M foam tape for attachment.

No project is too small or large. Give us a try, contact us today!
